

NAB's petition 04-160 is another way heavy "underhanded" political lobby tries to stifle services offered to an already underserved and choked economy. XM radio is offering services that is not only wanted by many it serves, but is also needed in underserved and depressed areas such as where I live. I would suggest that the NAB look to areas like here to see just what the "real world" is like instead of listening to the people with the deep pockets.
